LIMITLESS

THE FREESTYLE ALLROUNDER

That's what you get with the new Choice 4. Kickers. Lagoon. Boots. Or Straps. We build the Choice 4 to do it all. And now with Katana tips, beveled deck, and tucked under bottom rails, you'll be killin' it everywhere.

Our latest iteration delivers improved versatility and performance while retaining the proven CNC milled Paulownia wood core and Cartan carbon construction that Choice riders demand. Feel the new Cartan powered Katana Channels and Deck Bevels fuel your jumps and unhooked repertoire. Our proven multi-channel hull delivers more woohoo's per mile than ever before. Go hard. Or take it easy. It's all good on the Choice 4.

UNCOMMON RAILS

The Choice 4 debuts unique top and bottom rails that improve riding comfort and performance. We beveled the top deck edge between the footpads by approximately 2mm in thickness. The bottom edge receives a new 60/40 tucked under rail between the pads that transitions into a flat box rail at the tips. Flex and water flow are improved, and it's more comfortable in chop. Our new rails may be harder to manufacture, but we're sure you'll appreciate these finer details.

Maybe you're not a wakestyler, but you could be one day. And perhaps you're not a big air expert yet, but you're on your way. So, keep your options open with the Choice 4 – a twintip with limitless options.

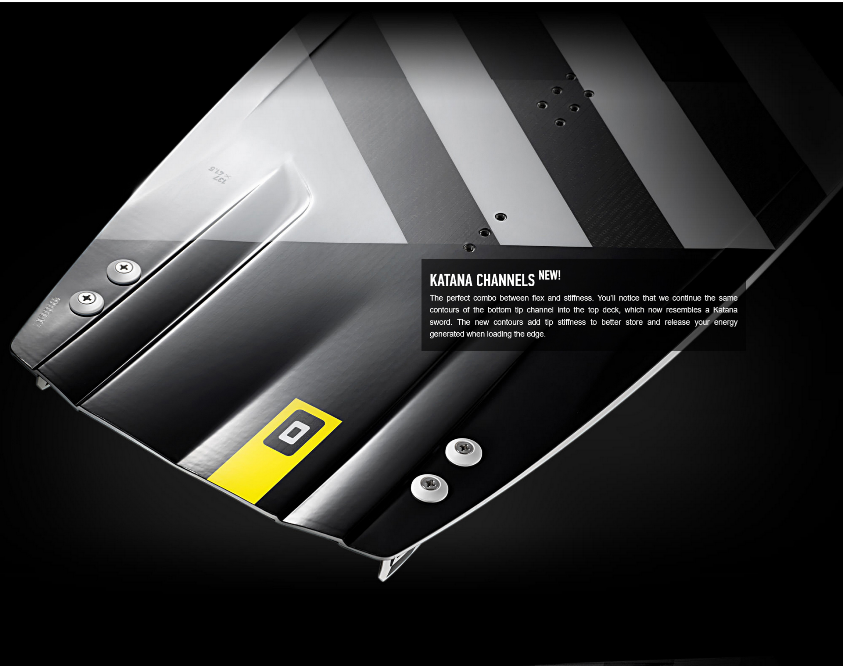
FEATURES

- KATANA CHANNELS
- 3D WOOD CORE
- PRO ROCKER
- REVO GRAB HANDLE
- BEVELED DECK
- V-SHAPED KEEL
- BOOT TOUGH INSERTS
- G10 CUTBACK FINS (48MM)
- TUCKED UNDER RAILS
- MULTI-CHANNELS
- G10 PRO FINS (42MM)
- G10 WAKE FINS (28MM)
- CARTAN® CARBON
- VARIO RAILS
- UNION PRO PADS & STRAPS

KEY FEATURE SNAPSHOT



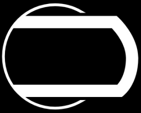
KATANA CHANNELS NEW!

The perfect combo between flex and stiffness. You'll notice that we continue the same contours of the bottom tip channel into the top deck, which now resembles a Katana sword. The new contours add tip stiffness to better store and release your energy generated when loading the edge.

137 x 41.5
CHOICE

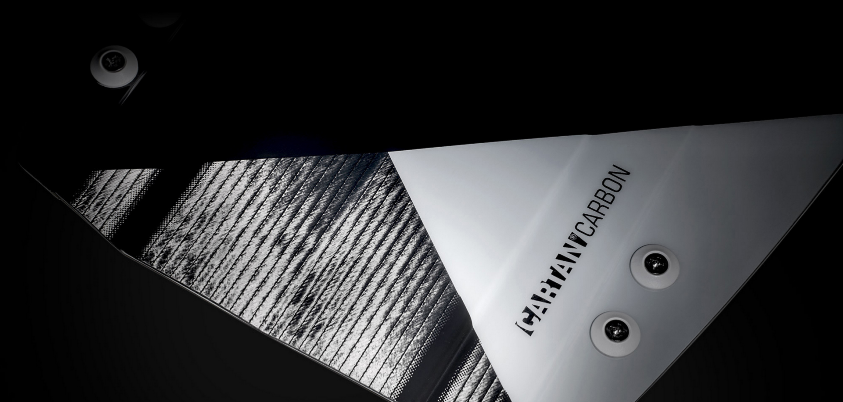
BEVELED DECK NEW!

The Choice 4 features a ¾ length deck channel between the straps that raises the outer deck (or lowers the area between the straps) by approximately 2mm. We bevel a slight negative slope from the visible deck channel outwards to the top edge and transition the bevel to a box rail near the tips. The new bevel reduces rail thickness and makes the Choice 4 a little more forgiving. The bevel also serves to increase flex for more pop. Now we're talking!



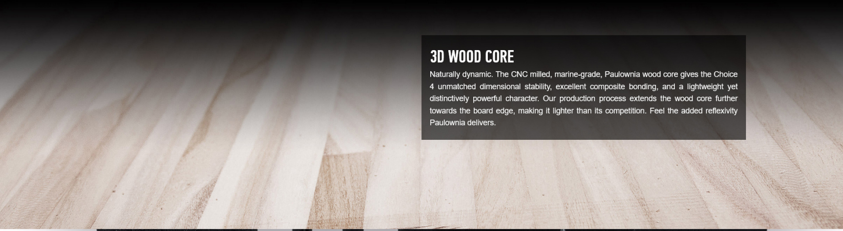
TUCKED UNDER RAILS NEW!

The board features a tucked under bottom rail between the straps that transitions to a box edge near the outer inserts. From there, the rail thins out to a sharper edge at the tips. The tucked under rail softens the ride and improves water flow, whereas the sharper tip edges add more bite. And we all appreciate a little more comfort in our lives.



CARTAN® CARBON

Powered by Cartan carbon. The Choice 4 takes full advantage of our proprietary, high performance, 30° biaxial carbon fiber weave that optimizes board torsion, and dynamic longitudinal flex. Our 12,000 filament carbon fiber requires less resin, has unmatched flex characteristics, and increases board durability. Cartan carbon. The secret ingredient behind every CORE twintip.



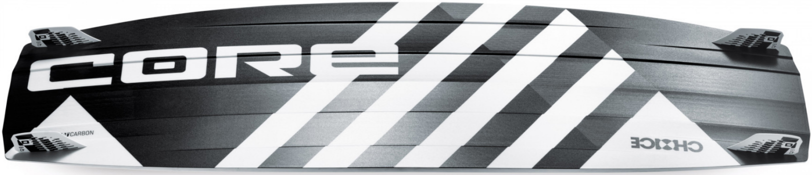
3D WOOD CORE

Naturally dynamic. The CNC milled, marine-grade, Paulownia wood core gives the Choice 4 unmatched dimensional stability, excellent composite bonding, and a lightweight yet distinctively powerful character. Our production process extends the wood core further towards the board edge, making it lighter than its competition. Feel the added reflexivity Paulownia delivers.

CARTAN® CARBON

V-SHAPED KEEL

Inspired by the legendary handling of deep-vee powerboats in rough waters, we extend a double concave, V-shaped keel for the full length of the board. The design eats chop and even smoothes out hard landings. Test the new Choice 4 in the roughest water you can find. And feel the deep Vee difference.



MULTI-CHANNELS

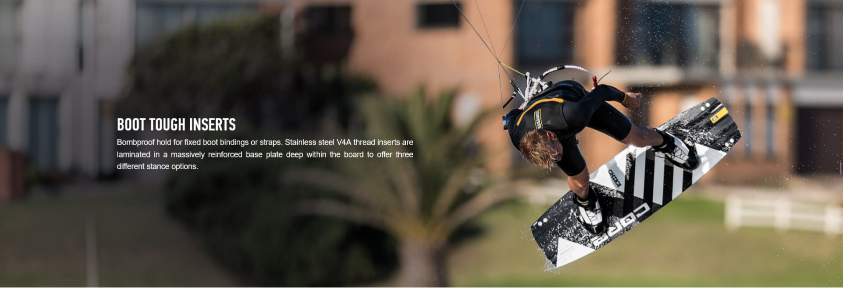
Extreme grip even without fins. Just like the Choice 3, four deep channels run the full length of the board. The channels reduce the wetted surface area and increase lateral resistance when planing (at all attack angles). Reducing the wetted surface area reduces drag and improves board speed. Go ahead and ride finless, your Choice 4 is always in control!

VARIO RAILS

Variable rail thickness. For better control and more pop. The Choice 4 features 12mm thick rails near the center of the board that reduces to approximately 5mm at the tips. Vario Rails better calibrate the board's flex properties.

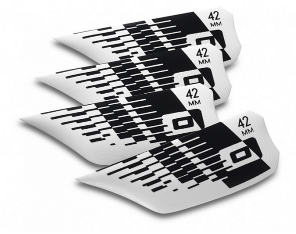
PRO ROCKER

The Choice 4 features a progressive freestyle rocker that is most pronounced under the handle. Board curvature is then reduced towards the tips. Individual flex patterns are built into each board size to lock in the best performance possible. Without giving away our secrets, good flex and bad (aka reverse) flex is measured and managed by varying the lamination thicknesses during production. A super-hard landing, for example, can create a negative rocker between your feet. We work very hard to eliminate bad flex, so those rock hard landings are easy to recover from. Not to worry, the Choice 4 is still deliciously fun when you are not "in training" mode. Go hard. Or easy. Either way, you'll love it.



BOOT TOUGH INSERTS

Bombproof hold for fixed boot bindings or straps. Stainless steel V4A thread inserts are laminated in a massively reinforced base plate deep within the board to offer three different stance options.



42MM G10 PRO FINS

A beautiful balance between resistance when you need it and the looseness you look for in a freestyle board. Too much fin for you? No problem. We also make 28mm wake fins. Still too much? No problem. Go finless and enjoy the ride.

ACCESSORIES/EXTRAS

CORE PADS & STRAPS

Don't wear boots? No problem! We've got two nice pad and strap options for you.
Both make a great connection to your Choice 4.

UNION PRO

Meet our Union Pro pads & straps with an improved, high-vis strap. We like the split strap design for its ridiculous customization options. It gives independent form-fitting adjustability to your forefoot and midfoot. Each half of the split straps is independently micro-adjustable with its own set of velcros. You can adjust the angle of your feet in 11 different ways to lock in your preferred stance and move your pad closer or further away from the board edge. The strap also sports 2cm of pad adjustability fore and aft to accommodate all foot sizes. We know, that's an insane amount of customization. We just want to make sure it fits everyone.

The Union Pro also features subtle changes to materials and design. We improved the footbed densities to prevent foot slippage and increase comfort. The pad ridges encourage feet to slip in and stay put. Are these pads & straps the easiest to adjust and best fitting? We think so.

Ride super comfortable. Ride Union Pro.

UNION PRO

REVO NEW!

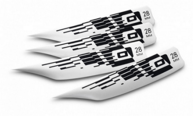
Quick on-the-fly rocker adjustment. Need less rocker for getting upwind faster? Or more rocker for your newest tricks? No problem with REVO, a clever rocker adjuster integrated into our grab handle. A quick turn of the handle activates REVO. Rocker is reduced 15mm, flattening the twintip and reducing its flex. This leads to a significant increase in planing and upwind performance.

REVO

CORE TWINTIP FINS

48MM G10 CUTBACK FINS

For the most hold, go 48. Agile, fun, and tuned for the Choice 4. Our G10 fins are designed for easy upwind performance, big airs, and extreme hold.



28MM G10 WAKE FINS

Designed to take a beating and then some. The wake fin's moderate slope and the optimized trailing edge is perfect for your next wakestyle session. It's not too big to get in the way yet grippy enough for more technical moves. And they complement the standard 42mm fins that come with the board.
