

RIOT XR2 LW
**THE MOST AGILE LIGHTWIND-
CROSSRIDE KITE**
15.0 | 17.0 | 19.0

RIOT XR2 LW - LIGHTWIND-EDITION

With the new Riot XR2 LW CORE presents a worthy successor to the Riot XR LW.

Now available in three sizes 15.0, 17.0 and 19.0 to cater for all riders, with a special light wind profile and light-wind optimised weight.

Experience incredible light-wind sessions and easy kitemoops.

Despite the incredible light-wind performance and easy upwind riding, the XR2 LW is still easily controllable in strengthening wind conditions. "LW" stands for Light Wind and this wasn't the only requirement we set when designing the three sized doldrums' killer.

LW FOR LIGHT WIND

All the XR2 performance and comfort characteristics have been added to the XR2 LW. Special emphasis has been placed on agility, which allows for dynamic riding in the light-wind sizes. This allows the new "LW" to accelerate easily with tight figure eights.

With the Riot XR2 LW you will experience dreamy light-wind session on glassy water, with massive power on demand for endless hang time and the agility for easy kitemoops.

All of this with the lightest breeze and the least amount of power required.

AGILITY FOR EASY KITEMOOPS

We maintain that the new Riot XR2 LW is not only the lightest light-wind tube kite on the market, but is also the only kite of its size which is easily able to do kitemoops.

The massive (and smooth) power delivery allows for huge airs and unmatched hang time in even the lightest winds.

All of this is achieved without compromising on the legendary Riot XR2 comfort. Of course the LW kites also include the Speed Valve, Speed Pump System and the CORE Intelligent Trim System.

ROBUST LIGHTWEIGHT CONSTRUCTION

The weight of the kite could, thanks to a new technique, be noticeably reduced; naturally without compromising on the typical CORE build quality. CORE guarantees that there was no skimping on the hard-wearing Dacron fabric or robust Kevlar at vital points on the kite.

With the Riot XR2 LW there is no need to leave the water when the wind exceeds 15 knots, for fear of having the seams fly past your ears. This quality is especially important for riders who want to use their light-wind kite in increasing winds or who require a bit more lift from the kite.

FULL PERFORMANCE WITH THE SENSOR-BAR

The new Riot XR2 LW is optimally matched to the SENSOR-Bar, with pressureless release on a virtual fifth line. The auto-launch is, CORE typical, simple and perfect.

RANGE / PRICE

	BEAUFORT	KNOTS	PRICE*
RIOT XR2 LW 15.0	3 - 5	8 - 20	EUR 1.499,-
RIOT XR2 LW 17.0	2,5 - 5	7 - 19	EUR 1.549,-
