

CHOICE

FREESTYLE | FREERIDE | WAKESTYLE

STRAPS. OR BOOTS: YOUR CHOICE.

The many faced freestyler. Whether it's stomping a big rail in boots or slamming a rally in straps. Or simply freeriding the Planet of the Apes. The Choice offers endless possibilities to experiment and make your own style.

CORE's proprietary 30° Biaxial carbon fiber weave optimizes board torsion and dynamic longitudinal flex. For more pop. And silly grins. The Choice's channels give you the grip you need with or without fins. And its rocker will get you out of trouble on those not so perfect landings. Boots or straps. Finned or finless. There really is no other Choice.

THE ALL-IN-ONE FREESTYLER

When it comes to radical maneuvers, you need a board that can control all your power. With its extreme board construction and bombproof boot inserts you can be assured that the Choice is the right choice. Take a look at some of the features that go into your first Choice:

FEATURES

- CARTAN® CARBON
- PRO ROCKER
- PROGRESSIVE & CHANNEL TIPS
- BOOT TOUGH INSERTS
- 3D WOOD CORE
- DIAMOND 3D-SHAPE
- UNION PRO PADS & STRAPS
- G10 PRO FINS (42MM)
- G10 WAKE FINS (28MM)

KEY FEATURE SNAPSHOT

CARTAN® CARBON

Our proprietary, high performance, 30° Biaxial carbon fiber weave optimizes board torsion and dynamic longitudinal flex. The build process also requires less resin thereby reducing swing weight. This means bigger pop and better durability. So go ahead and try that new move!

PRO ROCKER

The Choice features a true, freestyle rocker for those off center landings.

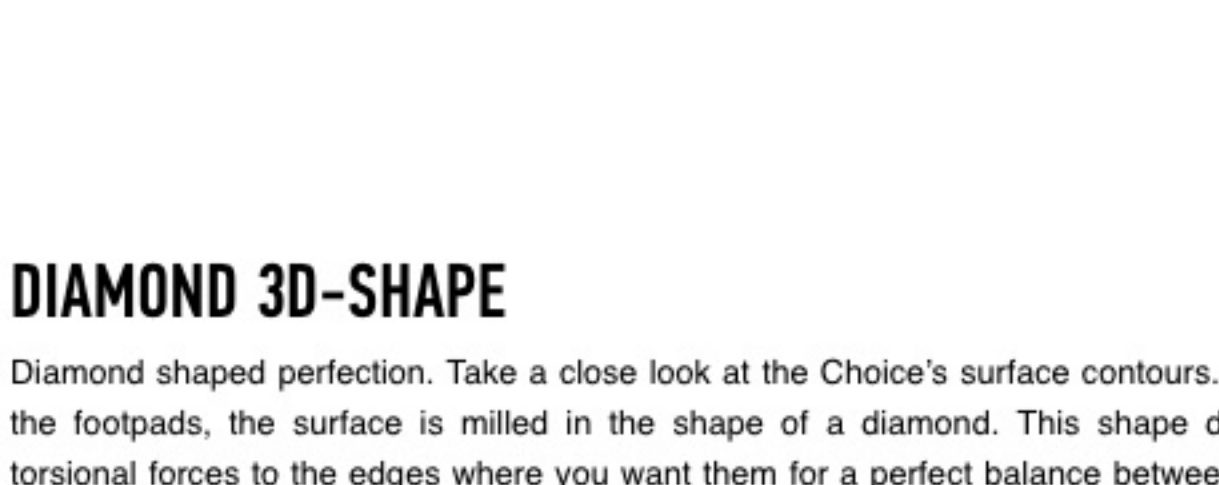

PROGRESSIVE & CHANNEL TIPS

Extreme grip even without fins. The multi channel design with two full-length outer channels and four progressive inner channels on each end creates amazing lateral support. Go ahead and ride finless!

BOOT TOUGH INSERTS

Bombproof hold for fixed boot bindings or straps. The stainless steel V4A thread inserts are laminated in a massively reinforced base plate deep within the board. The inserts feature three different stance options.

3D WOOD CORE

Naturally dynamic. The 3D contoured, long grained Paulownia wood core gives the Choice dimensional stability, decay resistance and a lightweight yet distinctively powerful character.

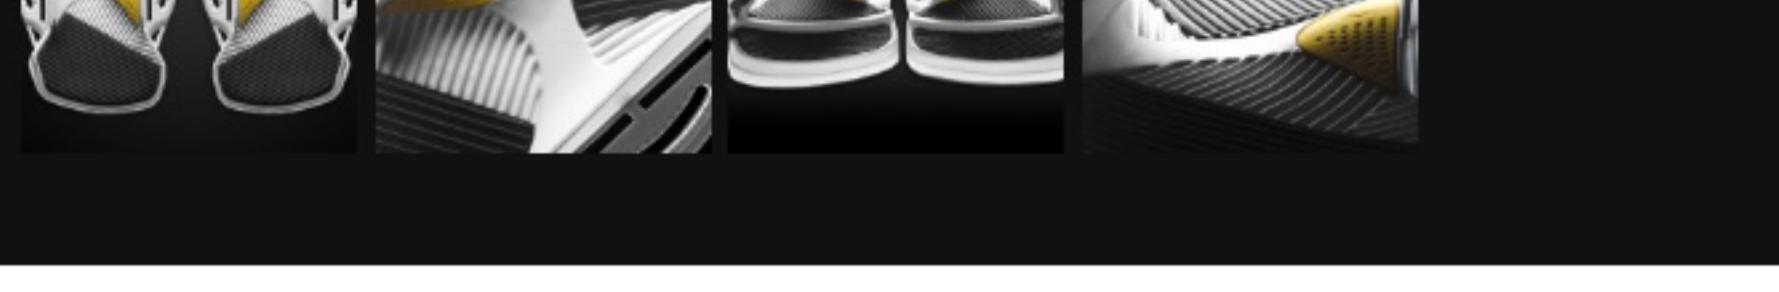

DIAMOND 3D-SHAPE

Diamond shaped perfection. Take a close look at the Choice's surface contours. Near the footpads, the surface is milled in the shape of a diamond. This shape directs torsional forces to the edges where you want them for a perfect balance between flex and rigidity.

CORE UNION PRO PADS & STRAPS

It's your Choice. Designed for boots. But also perfectly suited to CORE's new Union Pads & Straps System we include in the board purchase. The orthotic EVA footpads with its "tee grabber" 3D surface will hold your feet securely even on those off balance landings. With a base plate that can accommodate nine different stances and three pad insert options we are sure you will find the perfect setup for your riding style. Similar customization options are found with the new CORE Union Pro straps to give you the perfect fit even with booties on! The dual strap design features effortless pitch, longitudinal and height adjustments to support your foot perfectly. We lined the strap interior with padded neoprene while protecting the exterior with durable synthetic leather.

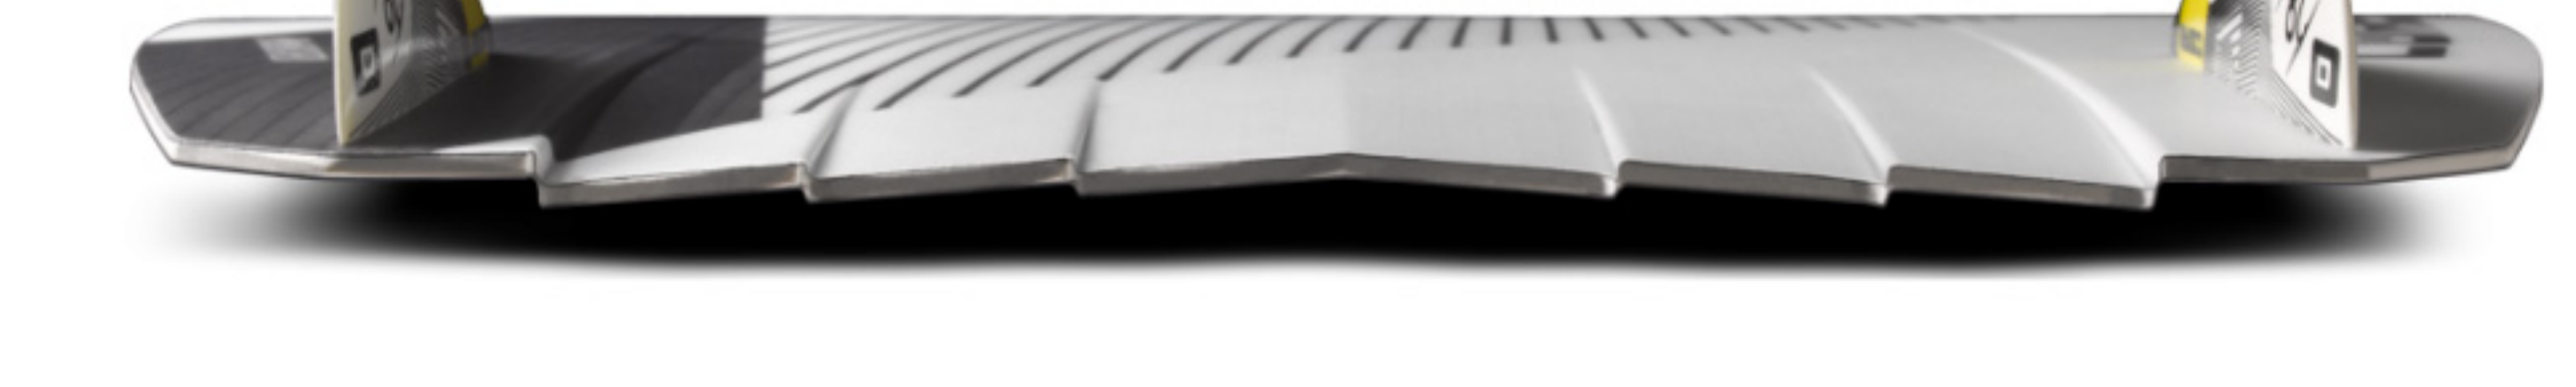

42MM G10 PRO FINS

A beautiful balance between resistance when you need it and the loose-ness you look for in a freestyle board. Too much fin for you? No problem. We also sell optional 28mm wake fins. Still too much? No problem. Go finless and enjoy the ride.

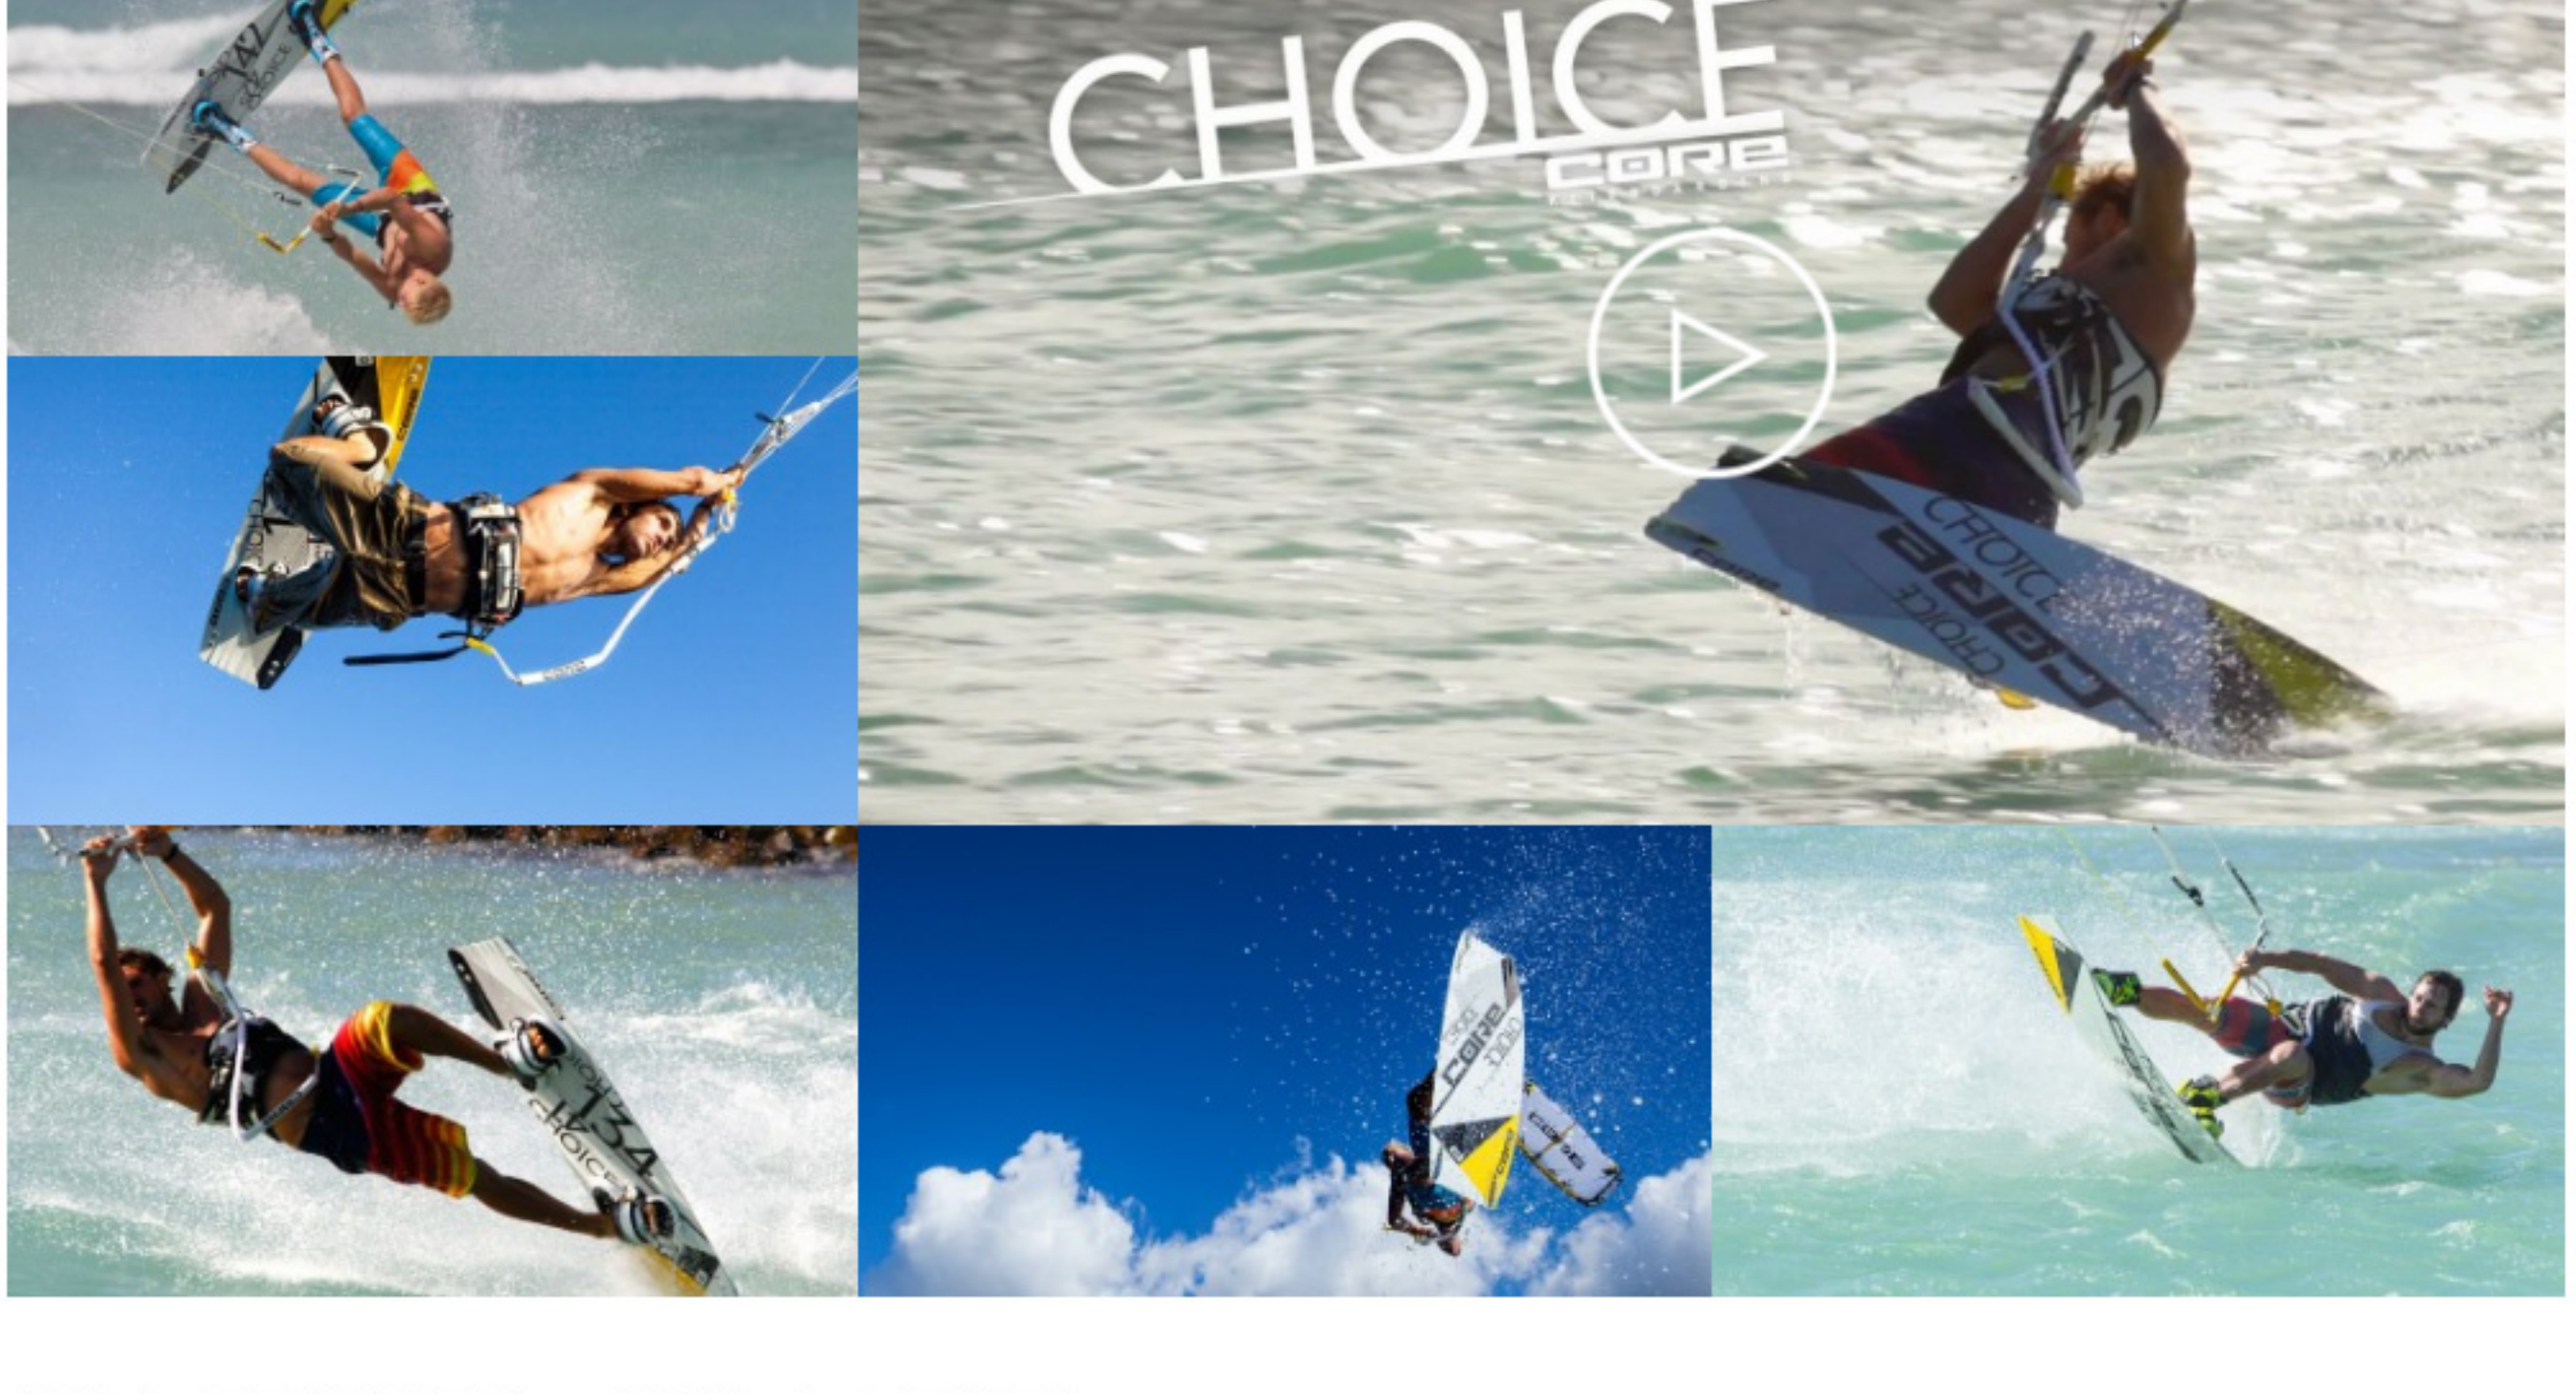

optional: 28MM G10 WAKE FINS

Designed to take a beating and then some. The wake fin's moderate slope and optimized trailing edge is perfect for your next wakesyle session. It's not too big to get in the way yet grippy enough for more technical moves.
