FREE

SURF. PLAY. SHRED.

Hang loose and ride knee highs like they're overheads. Test your limits on those really big days. Or, just chill and cruise on your trusty surfboard, twintip or skimboard. Without fussing about your kite or the wind. Because you know the new CORE Free is there for you. With its mad surf skills, smooth air-style, and signature CORE ride-ability, you may suspect your new kite has super powers. And we think so too.

This 3 strut, delta bow inspired design lets you be you. A kite that gives you the freedom to surf, play or shred. In the waves. Or on the slick. With the comfort of your favorite sneakers. The precision of an F-15. And waterstarts of a kite half its size. Your first choice for short sessions, wicked weekends or your next round the world adventure. Express yourself with CORE's newest addition to its legendary Universal⁺ Series of high performance all-rounders. And experience the awesomeness of this wave, freeride, and hooked-in style master.

FEATURES

- 3 STRUT LIGHT FRAME
- DELTA BOW SHAPE
- INTELLIGENT ARC
- 4 LINE SETUP
- SHORT BRIDLE SYSTEM
- ExoTex® ULTRA RIGID DACRON
- ®CORETEX® TRIPLE RIPSTOP
- SPEED VALVE 2
- GRINTEX® PATCHES
- ○●○ CIT
- SPEED PUMP SYSTEM
- INSTANT AUTO RELAUNCH
- SENSOR BAR READY

KEY FEATURE SNAPSHOT

3 STRUT LIGHT FRAME

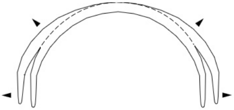
Less is more. The Free inherits the GTS's 3 Strut Light Frame concept which promotes more twist than a similar kite with five struts. More twist initiates faster turns and bigger grins. In addition, the reduced kite weight improves slack line drifting.

DELTA BOW SHAPE

The best of both worlds. The Free is recognized by the classic concave trailing edge of a bow; the swept back wings and smaller tips of a delta shape. This magic combination maximizes depower and control for early planing; upwind performance and, of course, big air. The shape also contributes to CORE's signature precision, bar feel, relaunch-ability, and turn characteristics.

INTELLIGENT ARC

Intelligent Arc is a bridle configuration perfected on the XR series that modifies the airfoil on demand in a linear and direct way. Like a bird that spreads its wings to generate more lift, the Free increases its wingspan with a pull on the bar. Likewise, sheet out and the kite folds in its wings and depowers. Intelligent Arc. For precise, controllable, power and depower on demand.



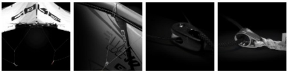
4 LINE SETUP

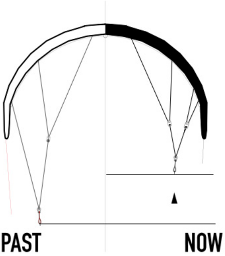
Classic, clean and safe. The Free's simple 4 line rigging gets you on the water in no time and benefits from the Sensor 2 bar's proven SSF safety. Why change something that ain't broke?

LEARN MORE ABOUT SSF SAFETY

ULTRASHORT BRIDLE SYSTEM

Say goodbye to bridle induced bowties with our shortest bridle system ever. The new configuration improves feedback so you can better sense your kite position. For precise, tight but not overpowering, pivoty turns. In the larger kite sizes, this reflexivity increases even more so. Say hello to the un-bowtie-able Free.





EXOTEX® ULTRA RIGID DACRON

Made in Germany. And exceptionally durable. ExoTex's new asymmetrical Dacron weave and emulsion (protective coating) process is specifically developed for our exoskeleton frames to prevent bulging, ripping and UV degradation. The no stretch fabric also improves airflow by permitting reduced leading edge and strut diameters. Despite reducing strut diameters, our new ExoTex fabric upgrades frame stiffness, flight stability and rider feedback.

CORETEX® TRIPLE RIPSTOP

Exclusive to CORE. Our, industry leading, triple ripstop canopy fabric is protected and strengthened with three different coating processes called emulsions. CoreTex sets new benchmarks in breaking strength, tear resistance, longevity, UV protection and elongation. Feel the tight, crisp signature only a CoreTex kite can deliver.

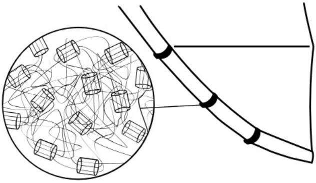
SPEED VALVE 2

No special hose adapter to misplace here! The reinforced Speed Valve 2 connects directly to any standard 20mm OD twist lock pump hose. The Speed Valve 2 maximizes airflow, minimizes inflation times and noticeably reduces pump pressure. This inflation/deflation system is so good you may even leave your electric pump at home.

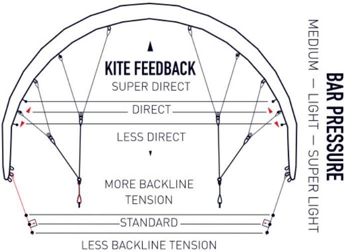


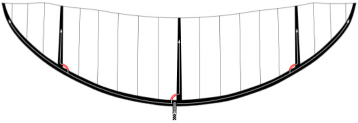
GRINTEX® PATCHES

Anti-wear protection where you need them most. New, extreme abrasion resistant patches on leading edge segment seams and strut attachment points will give you another level of protection from those perfectly placed beach hazards.

CORE INTELLIGENT TRIM SYSTEM (CIT)

Kite speed and bar pressure is a matter of choice. Your choice. With fully adjustable back line tension (aka trim), bar pressure and kite turning speed, our quick adjusting trim system gives you the freedom to ride any way you like. But don't worry, the kite comes out of the bag ready to fly so you can play with the adjustments later.





SPEED PUMP SYSTEM

First one on the water wins! We installed big strut distribution hoses and designed more aerodynamic strut valves to make air flow faster into the struts. We did this all for you because we know how much you enjoy inflating your kite.

INSTANT AUTO RELAUNCH

Dropping this kite won't raise your pulse. Just give the bar a little tug when the Free hits the water and watch it drift into a perfect relaunch position where it's ready to safely pop back into the air. Wave riders will appreciate how easily the kite releases from the water when time is of the essence. So go ahead and try that strapless 360, you know your Free has your back.

SENSOR BAR READY

The Free is fully compatible with the Sensor 2 and Sensor 2S bar system which features precise kite control and our unparalleled Supported Single Frontline Safety (SSF) system. The super clean design has no bobbles to interfere with your style and the ingenious no sag flag/safety line is more aerodynamic (and looks better!).
